

MobileWall

Secure Mobile Data Networks

The MobileWall Triple Play

MobileWall is built for business with capabilities that will enforce your mobile network policies for data protection, usage and cost management.

Security

MobileWall provides your business with secure mobile wireless connections.

Visibility

MobileWall offers insights into your corporate mobile data usage.

Control

MobileWall automates management of your mobile data usage and costs.

Take Advantage of MobileWall's Advanced Functionality

- ✓ End-to-End Data Encryption
- ✓ Zero-Trust Network Access
- ✓ Malware Protection
- ✓ Static Private IP Addresses
- ✓ Secure Remote Access
- ✓ Internet Use Policy Enforcement
- ✓ Usage Throttling
- ✓ **EXCLUSIVE!** App Throttling
- ✓ **EXCLUSIVE!** Multi-Firewall Termination

3 DIFFERENTIATORS

App Throttling

An industry first, MobileWall's exclusive App Throttling feature enables your business to slow down specific applications, easing the traffic burden on your mobile networks, regulating usage and reducing costs.

Multi-Firewall Termination

MobileWall is on the only Zero Trust Access Network (ZTNA) that lets you terminate data packets into multiple locations, such as internet, public clouds or on-premises devices like firewalls or routers.

Best Value

Choose one of our affordable monthly plans:

- MobileWall Essentials for security and visibility - \$1.50 per line
- MobileWall Professional for security, visibility plus control - \$3 per line

2 CASE STUDIES

HEALTH CARE

Secure Mobile Record Keeping

CyberReef built a HIPAA-compliant dedicated APN for a home health care agency, enabling nurses to access and update patient records remotely and securely from their smartphones or tablets while blocking unapproved apps like video streaming. The staff saves time, record accuracy is improved and hospital data costs are kept in check.

TOUR COMPANY

Enabling iCloud for Travelers

A tour company rented Mi-Fi devices to travelers with unlimited data usage, but Apple iCloud backups were hogging data and eating into margins. Instead of restricting all iCloud access, CyberReef blocked iCloud backups, cutting mobile data usage, saving money and improving margins — while keeping customers happy.

1 THING TO REMEMBER

CyberReef's MobileWall solves critical business challenges with mobile networking, such as:

- Collapsing time to deployment from months to days
- Reducing data usage and costs by 30 percent
- Replacing unsecured wireless connections with end-to-end encryption

ASK ABOUT

- ▶ MobileWall for Education with CIPA-compliant content filtering
- ▶ MobileWall for Healthcare with HIPAA-compliant data privacy controls
